Discussed need for clear policy. Philip has been working on a draft document, however, noted that each building has unique issues related to emergency lighting, alarm systems, and accessibility which can be challenging when developing one clear policy (as well as the time of day the outage occurs - NB Power onsite and killed power to campus until 6pm. Email sent out early afternoon that those able to work from home could do so. Suggested sending message through mass notification system as most staff/students have cell phones set up for this system. - Question on what process is in place for buildings with key entry card accessibility when power is out and potential phone issues once VOIP is implemented? Philip said it affects front door (not individual rooms) and wheelchair accessibility. In residence RA's stand by door and let students in. - Policy recommendations can be sent directly to Philip.
